

## GHI Software Release Note

JUNE 1985

To clear up the confusion caused by changes in the way software has been released, all future software releases will be issued on disks which contain both the software release and the following command files :

<u>.CMD File Name</u>	<u>Function</u>
XXLOAD.CMD	Loads and links software release
XXGET.CMD	Gets files required off floppy
XXPUT.CMD	Puts files required on floppy, to create backup release floppy.

Where XX is :-

DR	for DRAFT / NET,
OP	for OPTI / NET,
VU	for VU /NET,
MI	for miscellaneous,
	etc.

Each software release is loaded in the same way. To do this type EXACTLY the following :

```
FLOP GET XXLOAD.CMD /NOC <CR>  
@XXLOAD <CR>
```

where <CR> indicates that you press the RETURN key. This will load and link the software onto the Boot area of your disc.

Please contact Bernard Farrell, Graphic Horizons, at (617)-491-6530 if any further clarification is required.

# GHI - Software Report Form

Program Name \_\_\_\_\_

Company Name \_\_\_\_\_

Program Version \_\_\_\_\_

Contact Name \_\_\_\_\_

## NATURE OF REPORT

Suggestion

For Your Info.

Program Bug

Problem Priority \_\_\_\_\_

High(1)-Low(5) - be honest !!

## Installation Information :

PERQ 1

HI

PERQ 2

HP

PERQ T2

Versatec

Wide Screen

Prism

Narrow Screen

Laser

COMPUTER

SCREEN

PLOTTER

PRINTER

Floppy with file demonstrating problem attached ?  Y  N

Problem Summary : \_\_\_\_\_

This will identify your report in list of known/outstanding/fixd bugs

Details of problem : \_\_\_\_\_
